Full-stack developer looking to grow with creative, enjoyable people.

Work

Cloudflare - Developer Relations *November 2017 - Present*

Cloudflare is a massive, global network that helps keep websites secure while making them faster.

My job was to write and review **Blog Posts**, give **Live Talks**, **Create and Improve Documentation**, and **Table Conferences** to increase our awareness with developers.

I beta tested and wrote documentation for our [Serverless Integration](#), wrote and coordinated blog posts that were published on blogs including [Okta](#), [DocuSign](#), and [Slack](#), and gave talks at places like **Oktane 18**, **MHacks**, and [TypeForm](#).

Kroger Technology - Web Developer *April 2017 - November 2017*

Kroger Technology is Kroger's technical division.

My job was to build custom **React/Redux** Components for kroger's web app and improve Microsites for child companies of Kroger.

I launched department pages that allowed people to shop online for their groceries and improved the functionality of other pages.

Eager.io (now Cloudflare Apps) - Web Development Intern *March 2016 - June 2016*

Eager.io was a platform that allowed developers to create a single **HTML/CSS/JS library** and publish to **WordPress**, **Drupal**, and **Joomla**.

My job was to build libraries, test them across browsers, incorporate feedback and deliver high-quality tools.

Many apps I built now run on thousands of websites and were built using **Babel** and **Node.js**.

Projects

Personal Blog: A **Ghost.io** instance for my blog posts and talks.

[Link](#)

Alarm Clock: An Alarm Clock application that allows people to sign up and save alarm times. I developed it using **Go** and **React**, and built a **CI/CD** pipeline on Gitlab for it using **Docker**
