San Francisco, California - 586-925-1341 - connor@connorpeshek.me https://github.com/Conzorkingkong - https://gitlab.com/users/Conzorkingkong/projects

Self-taught full-stack web developer with a passion for JavaScript (and a crush on Go).

Objective

To grow as a programmer with creative, enjoyable people who love the craft.

Work

Cloudflare - Developer Relations November 2017 - Present

Cloudflare is a massive, global network that helps keep websites secure while making them faster.

My job was to write **Blog Posts**, give **Live Talks**, and **Table Conferences** to increase our awareness with developers. I also **Improved Documentation** by incorporating developer feedback.

I made PR's to the docs, wrote blog posts that were published on blogs including **Okta**, **DocuSign**, and **Stripe**, and gave talks at places like **Oktane 18**, **MHacks**, and **TypeForm**.

Kroger Technology - Web Developer April 2017 - November 2017

Kroger Technology is Kroger's technical division.

My job was to build custom **React/Redux** Components for kroger's web app and improve Microsites for child companies of Kroger.

I launched department pages that allowed people to shop online for their groceries and improved the functionality of other pages.

Eager.io (now Cloudflare Apps) - Web Developer Intern March 2016 - June 2016

Eager.io was a platform that allowed developers to create a single HTML/CSS/JS library and publish to WordPress, Drupal, and Joomla.

My job was to build libraries, test them across browsers, incorporate feedback and deliver high-quality tools.

Many apps I built now run on thousands of websites and were built using **Babel** and **Node.js**.

Projects

Personal Blog: A **Ghost.io** instance that has previous blog posts I've written.

Link: https://blog.connorpeshek.me

Alarm Clock: A NERD Stack application that allows people to sign up and save alarm times. Has integrated

CI/CD on Gitlab using Docker

Link: https://conzorkingkongclock.herokuapp.com/

Hacker News Clone: A front-end made for Hacker News' read-only API. Built with React, Redux and React

Router, it supports routing, searching for posts, and viewing posts and users.
