Connor Peshek   Software Engineer

Detroit, Michigan - 586-925-1341

connor@connorpeshek.me - github.com/ConzorKingKong

Self-taught client-side web developer with a passion for JavaScript.

Objective

To grow as a programmer with people who enjoy the craft and are excited to find creative solutions to interesting problems.

Work

Eager Inc. - Software Engineer Intern   *March 2016 - June 2016*

Eager is an app platform that lets developers create a single **HTML/CSS/JS library** and publish to **WordPress**, **Drupal**, and **Joomla**.

My job was to build libraries, test them across browsers, incorporate feedback and deliver high-quality tools.

Many apps I built now run on dozens of websites and were built using **Babel**, **Node.js**, and **Sass**.

I also contributed to the team's **AngularJS** app by adding routes and changing layouts.

Projects

Hacker News Clone: A front-end made for Hacker News' read-only API. Built with **React-Redux**, it supports viewing and searching for posts and users.

Hotels R Us: A **MEAN Stack** application that allows people to sign up and rate hotels.
Link: https://hotelsrus.herokuapp.com/#/

Tweet This!: An Eager library that allows visitors to tweet text content on a site simply by highlighting it.

Education

Web Development with a concentration in **JavaScript**, **NodeJS**, and **React-Redux**.

Codecademy - March 2016
