Connor Peshek   Software Engineer

Portland, Oregon - 586-925-1341

connorpeshek@gmail.com - github.com/ConzorKingKong

Objective

Self-taught client-side web developer with a passion for JavaScript.

My objective is to grow as a programmer with people who enjoy the craft and are excited to solve problems.

Work

Eager Inc. - Software Engineer Intern   *March 2016 - June 2016*

Eager is an app platform that lets developers create a single **HTML/CSS/JS library** and publish to **WordPress**, **Drupal**, and **Joomla**.

My job was to build libraries, test it across browsers, incorporate feedback and deliver a high-quality tool.

Many apps now run on dozens of websites and were built using **Babel**, **Node.js**, and **Sass**.

I also contributed to the team's **AngularJS** app adding routes and changing layouts.

Projects

Cover message: A library to allow websites to show a marketing or growth related message above the page or allow people to sign up for a newsletter.

PayPal Buttons: A library to allow people to add paypal buttons to their site for donations, purchases or subscriptions.

Tweet This!: A library that allows visitors to tweet text content on a site simply by highlighting it.

Education

Web Development with a concentration in **JavaScript**, **Ruby on Rails**, and **Angular.js**.
Codecademy - March 2016
